

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdn Ethical Corporate Bond Fund, a Sterling denominated sub fund of the abrdn OEIC V, Retail Inc Shares (ISIN: GB00B0LNNJ75). This fund is managed by abrdn Fund Managers Limited..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in sterling denominated investment grade corporate bonds which adhere to the abrdn Ethical Corporate Bond Investment Approach.

Performance Target: To be top quartile within the fund's peer group; defined as the Investment Association Sterling Corporate Bond Sector, over rolling five-year periods (after charges). There is no certainty or promise that the Performance Target will be achieved. Due to the ethical nature of the management process, there are a material number of stocks and sectors that the fund is unable to invest in while other funds in the Investment Association Sterling Corporate Bond Sector can, which means the fund's performance profile may deviate significantly from that of the Investment Association Sterling Corporate Bond Sector average.

The Investment Association Sterling Corporate Bond Sector (the "Sector") is a representative group of investment funds with a focus on sterling denominated investment grade bonds issued by companies.

Investment Policy

Portfolio Securities

- The fund will invest at least 60% in sterling denominated investment grade corporate bonds (which are like loans to companies that pay interest and are typically regarded as having a low default risk) issued anywhere in the world.
- The fund may also invest in other bonds, including high yield bonds (which are like loans to companies or governments that pay a high rate of interest but have a lower credit rating than investment grade bonds). The fund will employ techniques to reduce (hedge) risk related to currency movements on non-sterling bonds.
- The fund may also invest in other funds (including those managed by Aberdeen Investments), cash and assets that can be turned into cash quickly.
- All investments will adhere to the abrdn Ethical Corporate Bond Investment Approach (the "Investment Approach") as set out in the prospectus.
- The fund applies a set of company exclusions which are related but not limited to fossil fuels, animal testing, weaponry, pornography, gambling, tobacco and alcohol.
- In addition, the investment team carries out qualitative and quantitative assessment of companies' ESG characteristics.
- The qualitative assessment utilises Aberdeen Investments' fixed income investment process, which enables portfolio managers to assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. A key component of this is the ESG Risk Rating, which enables the management team to qualitatively identify and avoid ESG laggards.
- The quantitative assessment utilises the Aberdeen Investments ESG House Score to evaluate how companies manage their ESG risks and assigns a score

accordingly. The global universe of scored companies is then sorted and split into 7 equal groupings, with at least 70% of the fund invested in companies in the top two groups.

Management Process

- The management team use their discretion (active management) to identify investments based on analysis of global economics along with analysis of an investment's prospects and creditworthiness (debt repayment ability) compared to that of the market.

- In seeking to achieve the Performance Target, the Markit iBoxx Sterling Collateralized & Corporates Index (the "Index") is used as a reference point for portfolio construction and as a basis for setting risk constraints. Due to the ethical nature of the management process, there are a material number of companies and sectors in the Index that the fund is unable to invest in, which means the fund's performance profile may deviate significantly from that of the Index, which is a representative index of the market for sterling denominated bonds issued by companies.

Please Note: The fund's ability to buy and sell bonds and the associated costs can be affected during periods of market stress which could include periods where interest rates move sharply.

Derivatives and Techniques

- The fund will make routine use of derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund.
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset. They can generate returns when the value of these underlying assets rise (long positions) or fall (short positions).
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- **Credit Risk** - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- **Interest Rate Risk** - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- **High Yield Credit Risk** - The fund invests in high yield bonds which typically carry a greater risk of default than those with lower yields.
- **ABS / MBS Risk** - Asset and mortgage backed securities are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- **Convertible Securities Risk** - These investments can be changed into another form upon certain triggers as such they can exhibit risks typically associated with both bonds and equities. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence

become less liquid.

- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- **ESG Investment Risk** - Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in assets which similar funds do not (and thus perform differently) and which may not align with the personal views of any individual investor.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry charge | 0.00% |
| Exit charge | 0.00% |

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

| | |
|-----------------|-------|
| Ongoing charges | 1.01% |
|-----------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|-----------------|-------|
| Performance fee | 0.00% |
|-----------------|-------|

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking. Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment. The annual report for each financial year will include detail on the exact charges made. The Ongoing Charge figure is as at 31/10/2025. A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus. Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

abrdrn Ethical Corporate Bond Fund, Retail Inc Shares, 31 December 2025

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section. Performance is calculated in GBP. The fund was launched in 2005. The share/unit class was launched on 2005.

Performance Target - IA Sterling Corporate Bond Sector Average from 02/12/2024. IA Sterling Corporate Bond Sector Average from 02/11/2005 to 01/12/2024|Portfolio Constraining Benchmark - Markit iBoxx Sterling Collateralized & Corporates
