

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdn Global Equity Fund, a Sterling denominated sub fund of the abrdn OEIC I, L Acc Shares (ISIN: GB00BD074M16). This fund is managed by abrdn Fund Managers Limited..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate growth over the long term (5 years or more) by investing in equities (company shares) worldwide.

Performance Target: To achieve a return in excess of the MSCI AC World Index over rolling five year periods (after charges). There is no certainty or promise that the Performance Target will be achieved.

Performance Comparator: The Investment Association Global Equity Sector Average.

The MSCI AC World Index (the "Index") is a representative index of world stock markets.

The Investment Association Global Equity Sector Average (the "Sector") is a representative group of investment funds with a focus on Global equities.

Investment Policy

Portfolio Securities

- The fund will invest at least 80% in global equities.
- The fund may also invest in other funds (including those managed by Aberdeen Investments), cash and assets that can be turned into cash quickly.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and company level.
- Their primary focus is on selecting companies using research techniques to select individual holdings. The research process is focused on finding high quality companies that can be held for the long term through the assessment of their

business model, the industry the operate in, their financial strength and the capability of their management team.

- Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the Index.

Derivatives and Techniques

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.

- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to equities.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Emerging Markets Risk** - The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via

Stock Connect / Bond Connect, there are additional operational risks, which are outlined in the prospectus.

- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.59%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/2025.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

abrdn Global Equity Fund, L Acc Shares, 31 December 2025

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 1983. The share/unit class was launched on 2016.

On the 2nd June 2025, the fund's performance target changed from aiming to outperform the index by 3% before charges to aiming to achieve a return in excess of the index after charges.

Performance Target - MSCI AC World Index from 02/06/2025. MSCI AC World Index +3.00% from 31/05/2019 to 01/06/2025. MSCI World +3.00% from 24/06/2002 to 30/05/2019 | Performance Comparator - IA Global Equity Sector Average
