# First Sentier Responsible Listed Infrastructure Fund

## Class E (Acc) GBP

a sub-fund of First Sentier Investors ICVC (the Company)

ISIN GB00BMXP3956

First Sentier Investors (UK) Funds Limited, the authorised corporate director of the Company

### Objectives and investment policy

**Objective:** The Fund aims to achieve an investment return from income and capital growth over the long term (at least five years).

**Policy:** The Fund invests in shares of companies that are involved in infrastructure around the world and are listed on exchanges worldwide. The infrastructure sector includes operating assets from the transport, utilities, energy and communications sectors. The Fund's manager intends to invest in a portfolio which is diversified by infrastructure sector, country and asset type/business model. The Fund has no set target for the number of companies it will invest in but the Fund's manager anticipates that typically the Fund will invest in around 35 - 45 stocks. The Fund's manager assesses companies by valuation and quality. The Fund's manager carries out further sustainability analysis to look more closely at companies' approaches to environmental, social and governance factors, and focuses on companies demonstrating improvements in these areas. It also seeks to identify those infrastructure companies contributing to, or benefitting from moves to implement UN Sustainability Goals. The Fund does not invest directly in infrastructure assets.

The Fund may invest up to 10% in other funds.

The Fund will only use derivatives to reduce risk or to manage the Fund more efficiently in limited cases.

**Strategy:** The manager's investment strategy is founded on the principle of stewardship, allocating capital to what we believe are good quality companies with sound growth prospects, strong management teams and that contribute to sustainable development. It seeks to engage actively and constructively with company leaders on sustainability and other investment risks and opportunities.

**Benchmark:** The Fund's performance is compared against the value of the FTSE Developed Core Infrastructure ex-Pipelines Index.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

**Recommendation:** This Fund may not be appropriate for investors who plan to withdraw their money within five years.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought and sold at that day's price.

### Risk and reward profile

Lower Risk ← Higher Risk  
Potentially Lower Rewards Potentially Higher Rewards

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments.
- Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested. Material risks not adequately captured by the SRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Single sector risk:** investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Concentration risk:** the Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.
- **Listed infrastructure risk:** the Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws. For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

## Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	N/A

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge	0.55%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	N/A
-----------------	-----

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charge is based on expenses for the year ending July 2024. It may vary from year to year. It excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

Further information can be found in the Buying, Selling and Switching Shares section of the Company's prospectus.
