What is this product?

Type:

The Fund is domiciled in Ireland and is an open-ended investment company and qualifies as an undertaking for collective investment in transferable securities ("UCITS").

Intended Retail Investor:

Investment in the Fund is suitable only for those persons and institutions for whom such investment does not represent a complete investment program, who understand the degree of risk involved (as detailed under the section of the Prospectus and Supplement headed "Risk Factors"), can tolerate a medium level of volatility and believe that the investment is suitable based upon investment objective and finance needs. Investment in the Fund should be viewed as medium to long term.

Objectives:

The investment objective of the Fund is to provide investors with both income and long-term capital appreciation.

The Fund invests primarily in a portfolio of European securities, excluding UK securities, or in the securities issued by companies transacting a significant proportion of their business (at least 50% of revenues) in Europe (excluding the UK).

The Fund intends to invest primarily in companies which pay dividends, but may invest in companies which do not pay dividends.

The Fund may invest in excess of 20% of its Net Asset Value in emerging markets. Under normal market conditions the Fund intends to invest in at least 20 stocks.

The Fund may invest in securities of companies with a wide range of market capitalizations and in companies domiciled throughout Europe but excluding the UK. The bulk of the Fund's investments will however be concentrated in liquid shares of companies with a market capitalisation in excess of \$500million, however the Fund may invest in

Term:

The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Prospectus, the Fund may be unilaterally terminated following written notice to investors subject to compliance with the Prospectus and applicable regulation. Subject to the liquidation, dissolution and termination rights of the Board of the Company as set forth in the Prospectus, the Fund cannot be automatically terminated.

liquid shares of companies with a market capitalisation of less than \$500million.

The Fund is considered to be actively managed in reference to the MSCI Europe ex UK Index (the "Benchmark") by virtue of the fact that it uses the Benchmark solely for performance comparison purposes.

Derivatives (a contract the value of which depends on the value of one or more underlying assets) may be used to manage the risk profile of the fund, reduce cost or generate additional capital or income. Currency hedging arrangements may be used to reduce the risk of currency movements in the value of overseas investments held by the fund.

You may sell your investment on any working day in Ireland and the UK.

Any income the Fund receives will be paid out to investors twice a year.

The depositary of the Fund is Brown Brothers Harriman Trustee Services (Ireland) Limited ("the Depositary").

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your original investment. In addition to the market price risk, please refer to the Prospectus for further information.

If the Fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

- Concentration Risk - A limited number of investments may be held which has the potential to increase volatility of performance.
- Equity Risk - The Fund invests mainly in shares, and the value of these may fall or rise due to a number of factors, including the performance of the company and general stock market and exchange rate fluctuations. The value of your investment may rise or fall and you could get back less than you invest.
- Financial Techniques Impact - The Fund may use derivatives to generate additional capital or income. A movement in the value of a derivative's underlying asset may have a much larger negative impact on the value of the Fund than if the Fund were to hold the underlying investment itself.
- Sustainability Risk - The Fund may be subject to sustainability risk, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.
- Beside the risks included in the risk indicator, other risks may affect the Fund performance. Please refer to the Company's Prospectus for further details.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable, moderate, and favourable scenarios shown are illustrations of what you might get back using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Investment: EUR 10,000			
Scenarios	If you exit after 1 year	If you exit after 5 years (recommended holding period)	
Minimum:	There is no minimum guaranteed return. You could lose some or all of your investment.

What happens if the Manager is unable to pay out?

The Manager is responsible for administration and management of the Company and does not typically hold assets of the Fund (assets that can be held by depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager and the Investment Manager have no obligation to pay out since the Fund's design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out. There is no public or private investor compensation scheme that can compensate for any losses due to the insolvency of the Company, the Manager and the Investment Manager.

What are the costs?

Costs over Time

The person selling you or advising you about the Fund may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the Fund performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment: EUR 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	229 EUR	1,878 EUR
Annual Cost Impact (*)	2.30%	2.50%

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.9% before costs and 9.4% after costs.
