WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 5 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your initial investment. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In addition to market risk other risks could be triggered i.e. counterparty risk, currency risk, interest rate risk, operational risk and liquidity risk. Refer to the Prospectus for full details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 Years Investment 10 000 USD

WHAT HAPPENS IF BARING INTERNATIONAL FUND MANAGERS (IRELAND) LIMITED IS UNABLE TO PAY OUT?

The assets of the Fund are segregated from those of Baring International Fund Managers (Ireland) Limited. The Depositary is responsible for the safekeeping of the Fund's assets. To that effect, if Baring International Fund Managers (Ireland) Limited defaults, there will be no direct financial impact on the Fund. In addition, the Fund's assets shall be segregated from the Depositary's assets, which limits the risk of the Fund suffering some loss in case of default of the Depositary. You may face a financial loss if your broker or the entity from whom you purchased the Fund was to default.

As an investor in the Fund, there is no compensation or guarantee scheme in place.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested.

Investment 10 000 USD	If you exit after 1 year	If you exit after 5 years
Total Costs	117 USD	742 USD
Annual Cost Impact*	1.2%	1.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.7% before costs and 4.5% after costs.
