First Sentier Asia Strategic Bond Fund Class I (M Distributing) HKD

a sub-fund of First Sentier Investors Global Umbrella Fund plc (the Company)

ISIN IE00B97RPX48

First Sentier Investors (Ireland) Limited, the Management Company

Objectives and investment policy

Objective: The Fund aims to provide income and grow your investment.

Policy: The Fund invests at least 70% of its assets in fixed income securities (investments which provide a certain level of income or interest) issued mainly by governments, government like organisations and other issuers in Asia or whose primary business is in Asia. The Fund may also invest less than 30% of its assets in fixed income securities issued by the United States government.

The Fund may invest more than 30% of its assets in debt securities in any one or more emerging markets in Asia, or any sector. However, the Fund may only invest less than 30% of its assets in offshore debt securities denominated in Chinese renminbi.

The Fund may invest up to 100% of its assets in investment grade (seen as being higher quality) fixed income securities. The Fund may also invest in fixed income securities with low or no credit rating.

The Fund may invest up to 100% in emerging markets in Asia and in any industry. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

The investments in the Fund will be mainly denominated in US Dollars or Asian currencies.

The Fund is not managed in reference to a benchmark. The Fund is actively managed meaning that the Fund's manager uses expertise to pick investments rather than tracking a benchmark.

The Fund may use derivatives for efficient portfolio management purposes (i.e. to reduce risk or costs, hedge or to generate additional capital and income) with a level of risk that is consistent with the risk profile of the Fund.

You can buy and sell shares in the Fund on any dealing day. A dealing day is generally defined as a day on which Irish banks and, if applicable, the relevant stock exchange(s) are open for business. Exceptions are noted on the FSI website. As long as we receive your instruction before 10 am (Irish time) on a dealing day, shares will be bought and sold at that day's price.

You may receive a regular income from your investment which will be paid monthly. Monthly distributions may be paid from capital which would erode capital and may erode future capital growth potential.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

Lower Risk ← Higher Risk
Potentially Lower Rewards Potentially Higher Rewards

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the nature of its investments.
- Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested. Material risks not adequately captured by the SRRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
 - **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
 - **Single country / specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.
 - **Interest rate risk:** bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
 - **Credit risk:** the issuers of bonds or similar investments that the Fund buys may get into financial difficulty and may not pay income or repay capital to the Fund when due.
 - **Below investment grade debt securities risk:** below investment grade debt securities are speculative and involve a greater risk of default and price changes than investment grade debt securities. In periods of general economic difficulty, the market prices of these types of securities may decline significantly.
- For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	N/A

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	1.25%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	N/A
-----------------	-----

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charge is based on expenses for the year ending December 2024. It may vary from year to year. It excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

There are fees for switching between sub-funds. The fee for switching into the Fund is 1%.

Further information can be found in the Buying, Selling, Converting and Switching Shares section of the Company's prospectus.
