## Guinness Sustainable Energy Fund (the "Fund"), Class Y GBP Acc, ISIN: IE00BFYV9L73

### Product

The Fund, a sub-fund of Guinness Asset Management Funds plc (the "Company"), is authorised and supervised by the Central Bank of Ireland ("CBI") in Ireland and manufactured by Waystone Management Company (IE) Limited (the "Manager"). The Manager is authorised in Ireland and regulated by the CBI and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

For more information on this product, please refer to [www.guinnessgi.com](http://www.guinnessgi.com) or call +44 20 7222 5703.

### What is this product?

**Type:** The Fund is domiciled in Ireland and is an open-ended investment company and qualifies as an undertaking for collective investment in transferable securities ("UCITS").

**Intended Retail Investor:** Investment in the Fund is suitable only for those persons and institutions for whom such an investment does not represent a complete investment program, who understand the degree of risk involved (as detailed under the section of the Prospectus and Supplement headed "Risk Factors"), can tolerate a medium level of volatility and believe that the investment is suitable based upon investment objectives and finance needs. Investment in the Fund should be viewed as medium to long-term.

**Term:** The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Prospectus, the Fund may be unilaterally terminated following written notice to investors subject to compliance with the Prospectus and applicable regulation. Subject to the liquidation, dissolution and termination rights of the Board of the Company as set forth in the Prospectus, the Fund cannot be automatically terminated.

### Objectives:

The Fund aims to increase the value of the amount you invest in it over a period of years.

The Fund invests in the shares of a range of companies in the sustainable energy industry. Sustainable energy means energy not requiring fossil fuels like oil or coal. Sustainable investments are defined as those investments i) that contribute towards global decarbonisation and ii) that do not significantly harm other sustainable investment objectives and iii) that follow good corporate governance practices.

The Fund intends to invest at least 80% of its net assets in equity securities of globally based companies involved in sustainable energy or energy technology sectors. Sustainable energy includes, but is not limited to energy derived from such sources as solar or wind power, hydroelectricity, tidal flow, wave movements, geothermal heat, biomass or biofuels. Energy technology includes technologies that enable these sources to be trapped and also various manners of storage and transportation of energy, including hydrogen and other types of fuel cells, batteries and flywheels, as well as technologies that conserve or enable more efficient use of energy.

Under normal market conditions the Fund intends to invest in at least 25 stocks. The Fund invests in securities of companies with a wide range of market capitalizations and in companies domiciled throughout the world, including companies domiciled in or traded on Emerging Markets. The Fund is considered to be actively managed in reference to the MSCI World Index (the "Benchmark") by virtue of the fact that it uses the Benchmark solely for performance comparison purposes.

You may sell your investment on any working day in Ireland.

Any income the Fund receives will be reinvested to grow the value of your investment.

The depositary of the Fund is Brown Brothers Harriman Trustee Services (Ireland) Limited ("the Depositary").

### What are the risks and what could I get in return?

#### Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your original investment. In addition to the market price risk, please refer to the Prospectus for further information.

If the Fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Beside the risks included in the risk indicator, other risks may affect the Fund performance. Please refer to the Company's Prospectus for further details.

## Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable, moderate, and favourable scenarios shown are illustrations of what you might get back using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Investment: GBP 10,000 (Recommended holding period: 5 years)			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum:	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress Scenario	What you might get back after costs	2,050 GBP	<b>2,810 GBP</b>
	Average return each year	- 79.48 %	- 22.42 %
Unfavourable Scenario	What you might get back after costs	7,710 GBP	<b>7,880 GBP</b>
	Average return each year	- 22.9%	- 4.66%
Moderate Scenario	What you might get back after costs	10,440 GBP	<b>21,580 GBP</b>

Favourable Scenario	What you might get back after costs	21,480 GBP	<b>25,970 GBP</b>
	Average return each year	114.81%	21.03%

Unfavourable: This type of scenario occurred for an investment between 12/2022 and 01/2025.

Moderate: This type of scenario occurred for an investment between 05/2018 and 04/2023.

Favourable: This type of scenario occurred for an investment between 02/2016 and 01/2021.

## What happens if the Manager is unable to pay out?

The Manager is responsible for administration and management of the Company and does not typically hold assets of the Fund (assets that can be held by depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager and the Investment Manager have no obligation to pay out since the Fund's design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out. There is no public or private investor compensation scheme that can compensate for any losses due to the insolvency of the Company, the Manager and the Investment Manager.

## What are the costs?

### Costs over Time

The person selling you or advising you about the Fund may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the Fund performs as shown in the moderate scenario.
- GBP 10,000 is invested.

Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	79 GBP	865 GBP
Annual Cost Impact (*)	0.79 %	0.92 %

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 17.55% before costs and 16.63% after costs.

### Composition of Costs

If you exit after 1 year			
One-off costs upon entry or exit	Entry costs	Up to 5.00% is the maximum amount you pay when entering this investment and you could pay less. You can find out the actual charges from your financial advisor, distributor or the third party selling you the product.	0 GBP
