

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Diversified Income Fund, a US Dollar denominated sub fund of the abrdn SICAV I, A Gross MInc USD Shares (ISIN: LU1124234862). This fund is managed by abrdn Investments Luxembourg S.A..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve a combination of income and some growth by investing in an actively managed diversified portfolio of transferable securities across a wide range of global asset classes.

The Fund aims to exceed the return on cash deposits (in this case represented by using the US Secured Overnight Financing Rate ("SOFR") as a benchmark) by 5% per annum over rolling five year periods (before charges). There is however no certainty or promise that the Fund will achieve this level of return.

Investment Policy

Portfolio Securities

- The Fund invests globally in a range of asset classes, derivatives, money-market instruments and cash.

- The Fund may also invest in other funds (including those managed by Aberdeen Investments) to gain exposure to a broad mix of assets from across the global investment universe.

- Asset classes that the Fund invests in may include listed equities including listed private equity, listed infrastructure, high yield bonds, emerging market bonds and asset-backed securities.

- Investments will adhere to the ESG criteria detailed in the Fund's "Sustainability related disclosures", which is published at www.aberdeeninvestments.com under "Fund Centre".

- This approach enables portfolio managers to qualitatively identify ESG risks and opportunities and avoid those companies considered to be exposed to the highest ESG risks. Additionally, a set of company exclusions are applied which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.

- Financial derivative instruments, money-market instruments and cash may not adhere to the Fund's ESG criteria.

Management Process

- The Investment Manager uses their discretion (active management) to identify a diverse mix of investments which they believe are most appropriate for the investment objective. As a result of this diversification, and during extreme equity market falls, losses are expected to be below those of conventional global equity markets, with a volatility typically less than two thirds of equities.

- Through the application of the ESG criteria, the Fund has an expected minimum of 10% in Sustainable Investments.

- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction. As part of this, where a company fails the thermal coal exclusion but is identified as having a clear and credible action plan to mitigate the adverse impact associated with these activities, the company will be deemed investable. This is to support their transition to ultimately comply with the thermal coal exclusions. Up to 5% of assets may be invested in such companies.

- The Fund's distribution stream (while subject to change) is intended to be kept at a generally stable rate, in-line with projected income/returns. While the Fund will generate income from the underlying holdings, there may be instances where distributions paid out will be supplemented by capital. The appropriate level of distributions will be regularly reviewed, taking into consideration any changes in market conditions or other factors which may impact the income generated within the Fund, and therefore can be revised down or up.

Derivatives and Techniques

- The Fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the Fund (often referred to as "Efficient Portfolio Management").

- Derivatives include instruments used to express short term views reflecting expected changes in interest rates, company share prices, inflation, currencies or creditworthiness of corporations or governments.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and

increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

- The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	1.24%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is at 30/09/2025. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at www.aberdeeninvestments.com.
