

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Global Income Bond Fund, a US Dollar denominated sub fund of the abrdn SICAV II, Z Inc Hedged GBP Shares (ISIN: LU1567988867). This fund is managed by abrdn Investments Luxembourg S.A..**

## OBJECTIVES AND INVESTMENT POLICY

### Investment Objective

The Fund aims to provide a combination of income and growth by investing in a diversified portfolio of debt and debt-related securities that are listed or traded anywhere in the world (including in Emerging Markets).

The Fund aims to outperform the Bloomberg Global Aggregate Corporate BBB Index (Hedged to USD) with a yield greater than the index over rolling three-year periods (before charges).

### Investment Policy

#### Portfolio Securities

- The Fund will invest in debt and debt-related securities, including government and corporate bonds, asset backed securities, sub-investment grade bonds and inflation-linked bonds.

- The Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and collective investment schemes.

- The Fund will not invest more than 20% in asset backed securities.

- Bonds will be of any credit quality. Up to 100% of the Fund may be invested in sub-investment grade bonds.

- Investment in corporate bonds will adhere to the ESG criteria detailed in the Fund's "Sustainability related disclosures", which is published at [www.aberdeeninvestments.com](http://www.aberdeeninvestments.com) under "Fund Centre".

- Aberdeen Investments' Overall Sustainability Assessment (OSA) provides an overall view on a company's sustainability based on scoring of its governance, operations, and products and/or services. To complement this the Investment Manager's fixed income investment process is utilised, which enables portfolio managers to qualitatively assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. Companies considered to be exposed to the highest ESG risks will be excluded. In addition, a set of company exclusions are applied, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.

- Green bonds, Social bonds or Sustainable bonds issued by companies otherwise excluded by the thermal coal exclusions are permitted, where the proceeds of such issues can be confirmed as not financing this activity.

- Financial derivative instruments, money-market instruments and cash may not adhere to the Fund's ESG criteria.

#### Management Process

- The Fund is actively managed without reference to a benchmark.

- Through the application of the Fund's ESG criteria, the Fund commits to having a minimum of 10% in Sustainable Investments and targets a lower carbon intensity

than the following comparable investment universe:

50% Bloomberg Global High Yield Corporate Index, 30% Bloomberg Global Aggregate Corporates Total Return Index and 20% JP Morgan CEMBI Broad Diversified Index.

- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies, in order to inform portfolio construction. As part of this, where a company fails the thermal coal exclusion but is identified as having a clear and credible action plan to mitigate the adverse impact associated with these activities, the company will be deemed investable. This is to support their transition to ultimately comply with the thermal coal exclusions. Up to 5% of assets may be invested in such companies.

- The Fund will seek to reduce the risk of losses and the expected change (as measured by annual volatility) in the value of the Fund is not ordinarily expected to exceed 8% over the longer term.

#### Derivatives and Techniques

- The Fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the Fund is primarily invested. Usage of Derivatives is monitored to ensure that the Fund is not exposed to excessive or unintended risks.

- In particular, interest rate swaps and government bond futures may be used to manage the overall interest rate risk in the portfolio, while contracts on credit default swap indices may be used to add or reduce high yield credit exposure, based on the investment team's view of the market.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

## RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional

liquidity and default risk compared to other credit securities.

- Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.14%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is at 31/12/2024. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at [www.aberdeeninvestments.com](http://www.aberdeeninvestments.com).

## PAST PERFORMANCE

Global Income Bond Fund, Z Inc Hedged GBP Shares, 31 December 2025

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 2014. The share/unit class was launched on 2017.

Benchmark - Bloomberg Global Aggregate Corporate BBB Index (Hedged to GBP)
