

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Asian Bond Fund, a US Dollar denominated sub fund of the Aberdeen Standard SICAV I, I Acc USD Shares (ISIN: LU1814411788). This fund is managed by abrdn Investments Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve a combination of income and growth by investing in bonds (which are like loans that can pay a fixed or variable interest rate) issued by governments, companies and other large organisations in Asian countries. The Fund aims to outperform the Markit iBoxx Asian Local Bond Index (USD) benchmark (before charges).

Investment Policy  
Portfolio Securities

- The Fund invests at least two-thirds of its assets in bonds issued by governments, companies and other large organisations in Asian countries.
- Up to 30% of the Fund may be invested in Mainland Chinese bonds listed or traded on Chinese Markets.
- Up to 10% of the Fund may be invested in a single bond if it is issued by a government, supranational institution or government-related body.
- Up to 5% of the Fund may be invested in a single bond if it is issued by a corporate issuer.
- Bonds will be of any credit quality. Up to 50% of the Fund may be invested in Sub-Investment Grade bonds.

Management Process

- The Fund is actively managed.
- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.

- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Fixed Income ESG Integration Approach are published at [www.abrdn.com](http://www.abrdn.com) under "Sustainable Investing".
- Derivatives and Techniques**
- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.
- Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus). If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares. Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future. The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free. The fund is rated as 4 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- Investing via Bond Connect involves special considerations and risks, including without limitation a less developed regulatory and legal framework, operational, title and regulatory risks.
- Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- The use of derivatives carries the risk of reduced liquidity, substantial

loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment. Inflation reduces the buying power of your investment and income. The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations. The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund. In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner. The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration. Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.86%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The ongoing charges figure is at 30/09/2022. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking. A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at [www.abrdn.com](http://www.abrdn.com).

## PAST PERFORMANCE

Asian Bond Fund, I Acc USD Shares, 31 December 2022

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in USD.

The fund was launched in 2018. The share/unit class was launched in 2018.

Performance prior to the launch date is based on the performance of Aberdeen Global II – Asian Bond Fund I-2 USD Acc – LU0513448125 which merged into this share class on 29/06/2018.

Benchmark – Markit iBoxx Asian Local Bond (USD) from 31/05/2013.

[50% Markit iBoxx ALBI, 50% JP Morgan Asia Credit] (USD) from 30/09/2010 to 30/05/2013.
