

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**China Onshore Bond Fund, a Offshore Renminbi (CNH) denominated sub fund of the abrdn SICAV I, K Acc Hedged USD Shares (ISIN: LU2233142103). This fund is managed by abrdn Investments Luxembourg S.A..**

## OBJECTIVES AND INVESTMENT POLICY

### Investment Objective

The Fund aims to achieve a combination of income and growth by investing in bonds (which are like loans that can pay a fixed or variable interest rate) issued by governments, government related bodies and/or corporations in Mainland China, priced in Onshore Renminbi (CNY).

The Fund aims to outperform the FTSE Chinese Government Bond Index (CNH) benchmark (before charges).

### Investment Policy

#### Portfolio Securities

- The Fund invests at least two-thirds of its assets in bonds issued by Mainland China issuers, priced in Onshore Renminbi (CNY).
- The Fund may invest up to 100% of its assets in Mainland Chinese bonds.
- The Fund may also invest in bonds priced in Offshore Renminbi (CNH) issued anywhere in the world, as well as bonds priced in other currencies which are issued by Chinese issuers.
- The Fund will not purchase securities that are rated below B- by Standard & Poor's or equivalent from another rating agency.
- Investment in bonds will adhere to the ESG criteria detailed in the Fund's "Sustainability related disclosures", which is published at [www.aberdeeninvestments.com](http://www.aberdeeninvestments.com) under "Fund Centre".
- Aberdeen Investments' Overall Sustainability Assessment (OSA) provides an overall view on a company's sustainability based on scoring of its governance, operations, and products and/or services. To complement this the Investment Manager's fixed income investment process is utilised, which enables portfolio managers to qualitatively assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. Companies considered to be exposed to the highest ESG risks will be excluded. In addition, a set of company exclusions are applied, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Green bonds, Social bonds or Sustainable bonds issued by companies excluded by the thermal coal exclusions are permitted, where the proceeds of such issues can be confirmed as not financing this activity.
- For government bonds, this approach evaluates the Environmental, Social, Governance and Political ("ESGP") characteristics of sovereign issuers, which results in an ESGP score being assigned to each issuer. In addition, a qualitative Direction of Travel assessment is conducted, allowing portfolio managers to identify where ESGP weaknesses are being adequately addressed by the issuer and this is not reflected in the data.
- Financial derivative instruments, money-market instruments and cash may not adhere to the Fund's ESG criteria.

### Management Process

- The Fund is actively managed.
- Through the application of the Fund's ESG criteria, the Fund commits to having a minimum of 5% in Sustainable Investments.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies, in order to inform portfolio construction. As part of this, where a company fails the thermal coal exclusion but is identified as having a clear and credible action plan to mitigate the adverse impact associated with these activities, the company will be deemed investable. This is to support their transition to ultimately comply with the thermal coal exclusions. Up to 5% of assets may be invested in such companies.
- The benchmark is also used as a basis for setting risk constraints but is not used as a reference for portfolio construction.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark.
- The Investment Manager seeks to reduce the risk of significant changes in the value of the Fund compared to the benchmark. The potential change in value of the Fund (as measured by expected volatility) is not ordinarily expected to exceed 150% of the potential change in value of the benchmark over the longer term.

### Derivatives and Techniques

- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

## RISK AND REWARD PROFILE

Lower risk ← Higher risk  
Typically lower rewards ← Typically higher rewards

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- Investing via Bond Connect involves special considerations and risks, including without limitation a less developed regulatory and legal framework, operational, title and regulatory risks.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector, or closely related group of industries or sectors.
- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional

liquidity and default risk compared to other credit securities.

- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.31%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is at 30/09/2025. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at [www.aberdeeninvestments.com](http://www.aberdeeninvestments.com).

## PAST PERFORMANCE

China Onshore Bond Fund, K Acc Hedged USD Shares, 31 December 2025

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in USD.

The fund was launched in 2018. The share/unit class was launched on 2020.

Benchmark - FTSE Chinese Government Bond (Hedged USD) from 05/06/2023. FTSE World Government Bond Extended China (1-10 year) Index, NAV Hedged to USD from 09/10/2020 to 04/06/2023

Past performance is not a guide to future performance.
