

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Climate Transition Bond Fund, a US Dollar denominated sub fund of the abrdn SICAV I, K Acc Hedged EUR Shares (ISIN: LU2332246185). This fund is managed by abrdn Investments Luxembourg S.A..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve a combination of income and growth by investing at least 90% in bonds (loans to governments and companies) issued worldwide, including in Emerging Market countries, that support the transition to a low carbon economy and society's adaptation to climate change.

Investment Policy

Portfolio Securities

- The Fund invests at least 90% in bonds, including corporate bonds and government bonds issued anywhere in the world, including sub-sovereigns, inflation-linked, convertible, asset backed and mortgage backed bonds.
- The Fund invests at least 70% in corporate bonds issued anywhere in the world.
- The Fund may invest up to 40% in Sub-Investment Grade bonds.
- Non-US Dollar denominated bonds will typically be hedged back to US Dollars.
- Investment in bonds will adhere to the Fund's sustainability criteria detailed in the Fund's "Sustainability related disclosures", which is published at www.aberndeeninvestments.com under "Fund Centre".
- This approach identifies companies that are lowering their greenhouse gas emissions or entities that are helping society adapt to the physical risks of climate change or companies whose products or services are helping reduce emissions in the wider economy.
- The approach also excludes companies with a 'High' rating, as per the Investment Manager's proprietary ESG Risk Rating.
- In addition, a set of company exclusions are applied, which are related to the UN Global Compact, State-Owned Enterprises (SOE), Tobacco, Alcohol, Gambling, Thermal Coal, Oil & Gas, Adult Entertainment and Weapons.
- This approach is expected to reduce the investment universe by a minimum of 20%.
- Financial derivative instruments, money market instruments and cash may not adhere to the Fund's sustainability criteria.

Management Process

- The Fund is actively managed.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies to inform portfolio construction.
- Through the application of this approach, the Fund commits to having a minimum

of 80% in Sustainable Investments.

- The holdings of the Fund are not selected with reference to a benchmark and the Fund does not aim to outperform any benchmark but the performance of the Fund (before charges) can be compared over the long term (5 years or more) against the following basket of indices, which is rebalanced to the stated weights on a daily basis:

60% Bloomberg Global Aggregate Corporates Index (USD hedged), 20% Bloomberg Global High Yield Corporates Index (USD hedged), 20% JP Morgan Corporate Emerging Market Bond Index (USD).

These indices are used for setting risk constraints and don't have any sustainable factors.

- The Investment Manager seeks to reduce the risk of significant changes in the value of the Fund compared to the above indices. The potential change in value of the Fund (as measured by expected volatility) is not ordinarily expected to exceed 150% of that of the above basket of indices over the longer term.

Derivatives and Techniques

- The Fund may use investment techniques (including derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they "derive" their price from another asset. They can generate returns when share prices and/or indices fall.

This fund is subject to Article 9 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.

- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.38%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is at 30/09/2025. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at www.aberdeeninvestments.com.

PAST PERFORMANCE

Climate Transition Bond Fund, K Acc Hedged EUR Shares, 31 December 2025

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in EUR.

The fund was launched in 2021. The share/unit class was launched on 2021.

Benchmark - [60% Bloomberg Global Aggregate Corporates Index (Hedged to EUR), 20% Bloomberg Global High Yield Corporates Index (Hedged to EUR), 20% JP Morgan Corporate Emerging Market Bond Index (Hedged to EUR)]

Past performance is not a guide to future performance.
