

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Markets SDG Corporate Bond Fund, a US Dollar denominated sub fund of the abrdn SICAV I, A Acc USD Shares (ISIN: LU2392363755). This fund is managed by abrdn Investments Luxembourg S.A..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve a combination of income and growth by investing in Emerging Market corporate bonds (loans to companies), which in our view will make a positive contribution to society through their alignment to achieving the United Nation's Sustainable Development Goals ('SDGs').

The Fund aims to outperform the JP Morgan ESG CEMBI Broad Diversified Index (USD) before charges.

Investment Policy

Portfolio Securities

- The Fund invests at least 90% in bonds.
- The Fund invests at least 70% in Emerging Market corporate bonds.
- The Fund may invest up to 15% in contingent convertible securities.
- The Fund may invest up to 10% in Frontier Market government bonds.
- Non-US Dollar denominated issues will typically be hedged back to US Dollars.
- Up to 100% of the Fund may be invested in Sub-Investment Grade bonds.
- Investment in bonds will adhere to the Fund's sustainability criteria detailed in the Fund's "Sustainability related disclosures", which is published at www.aberdeeninvestments.com under "Fund Centre".
- The Fund will invest in companies with a minimum of 20% of their revenue, profit, capital, operating expenditure or research and development linked to the UN SDGs. For companies classified in the benchmark as "Financials", alternative measures of materiality are used based on loans and customer base.
- The Fund may invest in Green bonds, Social bonds or Sustainable bonds. Up to 10% may be invested in such bonds issued by companies that do not meet the materiality thresholds, as defined above.
- In addition, a set of company exclusions are applied, which are related to the UN Global Compact, State-Owned Enterprises (SOE), Tobacco, Thermal Coal, Oil & Gas, Electricity Generation, Gambling, Alcohol, Adult Entertainment and Weapons.
- This approach is expected to reduce the investment universe by a minimum of 25%.
- Financial derivative instruments, money market instruments and cash may not adhere to the Fund's sustainability criteria.

Management Process

- The Fund is actively managed.
- The Fund's sustainability criteria excludes companies with a High ESG Risk Rating and identifies: Companies aligned to the UN SDGs, which are designed to address the world's major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption. OR Countries

which meet our criteria on Environmental, Social, Governance and Political factors.

- Through the application of this approach, the Fund commits to having a minimum of 80% in Sustainable Investments. It also targets a lower carbon intensity than the benchmark.

- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies to inform portfolio construction.

- The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints. In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The Fund's investments may deviate significantly from the components and their weightings in the benchmark. Due to the active and sustainable nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark.

- In addition, in order to assess performance against the broad Emerging Market corporate bond universe, the Fund's performance before charges can be compared to the JP Morgan CEMBI Broad Diversified Index (USD).

Derivatives and Techniques

- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.

This fund is subject to Article 9 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- Applying ESG and sustainability criteria in the investment process may result

in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	1.17%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is at 30/09/2025. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at www.aberdeeninvestments.com.

PAST PERFORMANCE

Emerging Markets SDG Corporate Bond Fund, A Acc USD Shares, 31 December 2025

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in USD.

The fund was launched in 2021. The share/unit class was launched on 2021.

Benchmark - JP Morgan ESG CEMBI Broad Diversified Index
