What is this product?

Type

Diversified Income Fund (the "Fund") is a US Dollar denominated sub-fund of a SICAV (société d'investissement à capital variable), abrdn SICAV I, incorporated in Luxembourg.

Term

abrdn SICAV I (the "Company") has no maturity date. The Fund and the Company may not be unilaterally terminated by abrdn Investments Luxembourg S.A.

Objective

The Fund aims to achieve a combination of income and some growth by investing in an actively managed diversified portfolio of transferable securities across a wide range of global asset classes.

The Fund aims to exceed the return on cash deposits (in this case represented by using the US Secured Overnight Financing Rate ("SOFR") as a benchmark) by 5% per annum over rolling five year periods (before charges). There is however no certainty or promise that the Fund will achieve this level of return.

Portfolio Securities

- The Fund invests globally in a range of asset classes, derivatives, money-market instruments and cash.
- The Fund may also invest in other funds (including those managed by Aberdeen Investments) to gain exposure to a broad mix of assets from across the global investment universe.
- Asset classes that the Fund invests in may include listed equities including listed private equity, listed infrastructure, high yield bonds, emerging market bonds and asset-backed securities.
- Investments will adhere to the ESG criteria detailed in the Fund's "Sustainability related disclosures", which is published at www.aberdeeninvestments.com under "Fund Centre".
- This approach enables portfolio managers to qualitatively identify ESG risks and opportunities and avoid those companies considered to be exposed to the highest ESG risks. Additionally, a set of company exclusions are applied which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Financial derivative instruments, money-market instruments and cash may not adhere to the Fund's ESG criteria.

Management Process

- The Investment Manager uses their discretion (active management) to identify a diverse mix of investments which they believe are most appropriate for the investment objective. As a result of this diversification, and during extreme equity market falls, losses are expected to be below those of conventional global equity markets, with a volatility typically less than two thirds of equities.
- Through the application of the ESG criteria, the Fund has an expected minimum of 10% in Sustainable Investments.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction. As part of this, where a company fails the thermal coal exclusion but is identified as having a clear and credible action plan to mitigate the adverse impact associated with these activities, the company will be deemed investable. This is to support their transition to ultimately comply with the thermal coal exclusions. Up to 5% of assets may be invested in such companies.
- The Fund's distribution stream (while subject to change) is intended to be kept at a generally stable rate, in-line with projected income/returns. While the Fund will generate income from the underlying holdings, there may be instances where distributions paid out will be supplemented by capital. The appropriate level of distributions will be regularly reviewed, taking into consideration any changes in market conditions or other factors which may impact the income generated within the Fund, and therefore can be revised down or up.

Derivatives and Techniques

- The Fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the Fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to express short term views reflecting expected changes in interest rates, company share prices, inflation, currencies or creditworthiness of corporations or governments.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus). If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Intended Retail Investor

Investors with basic investment knowledge. Investors who can accept large short term losses. Investors wanting income and some growth over the longer term (5 years or more). The Fund has specific and generic risks with a risk rating as per the risk indicator. The Fund is intended for general sale to retail and professional investors through all distribution channels with or without professional advice.

The Fund's depositary is Citibank Europe plc Luxembourg Branch. The prospectus, the articles of association, the annual reports and interim reports may be obtained free of charge from our website or via the contact details in 'Other relevant information'. All documents are available in English and German; the prospectus is also available in French and Italian. What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you sell it at an earlier stage. The value of investments and the income from them can go down as well as up, and you may get back less than you invested.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Where the currency of the country where you are resident is different to the currency of the product, **please be aware of currency risk**. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Further information on risks is detailed in the prospectus available at www.aberdeeninvestments.com or on request from the management company. This product does not include any protection from future market performance or any capital guarantee against credit risk, so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 SGD	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,750 SGD	6,760 SGD
	Average return each year	-32.5%	-7.5%
Unfavourable	What you might get back after costs	8,870 SGD	10,000 SGD
	Average return each year	-11.3%	0.0%
Moderate	What you might get back after costs	9,930 SGD	12,170 SGD
	Average return each year	-0.7%	4.0%
Favourable	What you might get back after costs	11,330 SGD	13,320 SGD
	Average return each year	13.3%	5.9%

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred in the benchmark between October 2024 and February 2026 . The moderate scenario occurred in the benchmark between March 2019 and February 2024. The favourable scenario occurred in the benchmark between July 2016 and June 2021.

What happens if the Company is unable to pay out?

There is no financial compensation scheme for retail investors in SICAVs domiciled in Luxembourg. In the absence of a compensation scheme applicable to investments in the Fund, investors may face a financial loss of up to their entire investment amount.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000 SGD is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	695 SGD	1,960 SGD
Annual cost impact (*)	6.9%	3.2% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.2% before costs and 4.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to 500 SGD
Exit costs	We do not charge an exit fee for this product.	0 SGD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.52% of the value of your investment per year. This is an estimate based on actual costs over the last year and includes any known future changes.	152 SGD
Transaction costs	0.43% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	43 SGD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	

How long should I hold it and can I take money out early?
